Cheryl,

Sara's agreements and her word are totally worthless, she has no conscience, she brags about being an ordained minister and a disciple of Christ. The program managers, the board and you all agreed at the special PCS board meeting October 29th that we would go before the city council together and try to calm the waters at their November 13th council meeting. The program managers and Sara used that opportunity to continue to personally attack me Jeff Lamb and tell lies about me and the PCS board members, as Marcia reported to you it was a real doosie of a meeting. The PM's behavior directly led to Neal Munson's resigning from the PCS board. Unless you have something in writing from the PM's and Sara that they won't use the open house as just another venue to spew their hate I suggest we call the open house off.

I have attached a sample of some of the letters and nasty comments that I've been receiving. I want to know when and how your team is going to start working on the damage that has been done to my family. I am at a total loss of how you do "DAMAGE CONTROL" (and it is picking up steam) when your team is unwilling nor will you allow the PCS board of directors to hold anybody responsible for their actions and the damage they have caused PCS.

I think you might be walking into a totally new situation when you get back from your vacation in December.

Regards,
Jeff
